A specially designed blade,
an integral part of the
Pergola Agava, is made

This watertight roofing blade
is the basic structural element.
When in a sequential sectional
layout, it forms a water tight cover
of exterior surfaces, resistant to
loads such as wind and snow. The
blades rotate and allow opening,
thus regulating the balance of
shade and sun exposure. This
provides us with an excellent
exterior living space in all seasons
and ensures long-term use.

Our outdoor products

Soltec **Pergola** Agava

We produce innovative Soltec pergolas, which are distinguished by technical perfection, aesthetic design and functionality. We strive to make technological progress and sustainable operation go hand in hand. We want to leave a mark, so we like to play with different solutions. Why not turn a pergola into a summer cinema under the stars or a warm shelter from the first cold?

Soltec **Carport** Agava

With their elegant lines, the Soltec carports blend in with the modern architecture of the house, while boasting incredible reliability. They are made of stainless steel and aluminum. But we didn't stop there. We know that a shortage of storage space in the house is very common, so you can add a shed for tires, tools, bicycles and everything that you have not been able to store elegantly so far to your new Soltec Carport.

Soltec **Glassport** Agava

Soltec glassports are the newest member of our family. You will hardly notice them above your door or terrace. The minimalist design is able to hold a large amount of rain and snow, while maintaining a view of the clear sky and letting a lot of light into the room. A glassport offers you shelter when you get home and represents the moment when everything is good and right again.
